

Triage Report: Base

Date: 2026-01-30 07:26:26

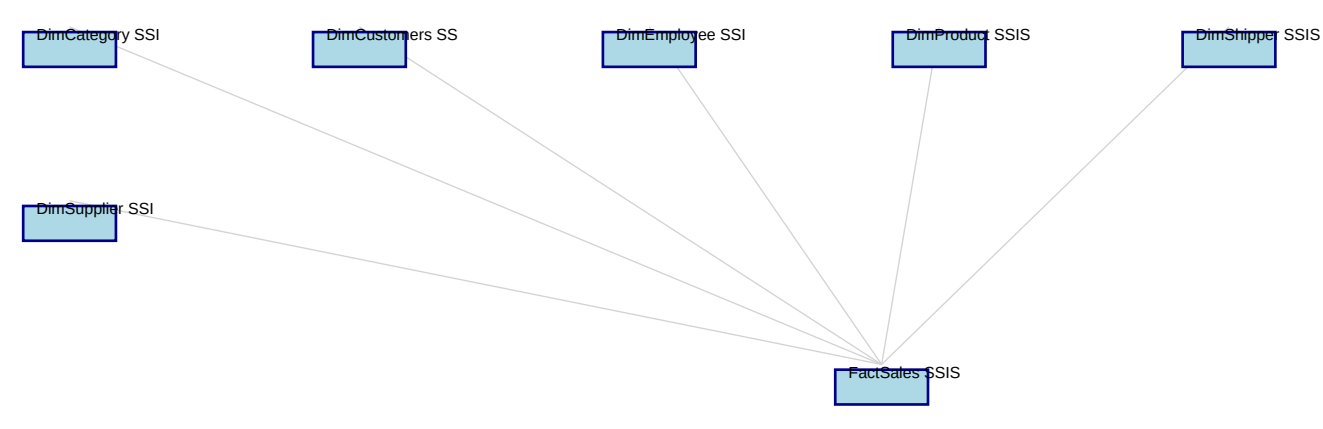

1. Executive Landscape

Technology Mix: SUPPORT: 2, CORE: 7, IGNORED: 2, LAYOUT: 1
Detected Paradigm: ETL

Summary: Architecture recovery complete. See detailed component breakdown for specific transformation logic.

2. Architectural Flow Visualization

Visual representation of the discovered migration mesh.

3. Observations & Strategic Risks

No major technical risks detected during automated triage.

3. CRUD Cross-Reference Matrix

Consolidated view of database IO and asset interactions.

No explicit table IO detected for matrix generation.

4. Detailed Component Analysis

Asset: DimCategory.dtsx

Purpose: Carga incremental de la dimensión Categoría desde sistema fuente a Data Warehouse.

Complexity: LOW | **Estimated Effort:** S (Small)

Upstream (Dependencies): FactSales SSIS Package

Downstream (Consumers): b0714cac-7ea2-477f-8e9f-a06f49f5b58a

Source Inputs: Production.Categories

Target Outputs: DimCategory

Logic Flow:

- Step 1: Ejecuta SQL para obtener el máximo categoryid.
 - Step 2: Extrae nuevos registros de Categories.
 - Step 3: Inserta en DimCategory.
-

Asset: DimCustomers.dtsx

Purpose: Carga incremental de la dimensión Cliente desde sistema fuente a Data Warehouse.

Complexity: LOW | **Estimated Effort:** S (Small)

Upstream (Dependencies): FactSales SSIS Package

Downstream (Consumers): b0714cac-7ea2-477f-8e9f-a06f49f5b58a

Source Inputs: Sales.Customers

Target Outputs: DimCustomer

Logic Flow:

- Step 1: Ejecuta SQL para obtener el máximo custid.
 - Step 2: Extrae nuevos registros de Customers.
 - Step 3: Inserta en DimCustomer.
-

Asset: DimEmployee.dtsx

Purpose: Carga incremental de la dimensión Empleado desde sistema fuente a Data Warehouse.

Complexity: LOW | **Estimated Effort:** S (Small)

Upstream (Dependencies): FactSales SSIS Package

Downstream (Consumers): b0714cac-7ea2-477f-8e9f-a06f49f5b58a

Source Inputs: HR.Employees

Target Outputs: DimEmployee

Logic Flow:

- Step 1: Ejecuta SQL para obtener el máximo empid.
- Step 2: Extrae nuevos registros de Employees.

- Step 3: Inserta en DimEmployee.
-

Asset: DimProduct.dtsx

Purpose: Gestión de la dimensión Producto con Slowly Changing Dimension (SCD).

Complexity: LOW | **Estimated Effort:** S (Small)

Upstream (Dependencies): FactSales SSIS Package

Downstream (Consumers): b0714cac-7ea2-477f-8e9f-a06f49f5b58a

Source Inputs: Production.Products, DimProduct (para SCD tracking)

Target Outputs: DimProduct

Logic Flow:

- Step 1: Extrae productos del sistema fuente.
 - Step 2: Aplica lógica SCD para detectar cambios.
 - Step 3: Actualiza/inserta registros en DimProduct.
 - Step 4: Actualizaciones condicionales vía OLE DB Command.
-

Asset: DimShipper.dtsx

Purpose: Carga incremental de la dimensión Shipper desde sistema fuente a Data Warehouse.

Complexity: LOW | **Estimated Effort:** S (Small)

Upstream (Dependencies): FactSales SSIS Package

Downstream (Consumers): b0714cac-7ea2-477f-8e9f-a06f49f5b58a

Source Inputs: Sales.Shippers

Target Outputs: DimShipper

Logic Flow:

- Step 1: Ejecuta SQL para obtener el máximo shipperid.
 - Step 2: Extrae nuevos registros de Shippers.
 - Step 3: Inserta en DimShipper.
-

Asset: DimSupplier.dtsx

Purpose: Carga incremental de la dimensión Supplier desde sistema fuente a Data Warehouse.

Complexity: LOW | **Estimated Effort:** S (Small)

Upstream (Dependencies): FactSales SSIS Package

Downstream (Consumers): b0714cac-7ea2-477f-8e9f-a06f49f5b58a

Source Inputs: Production.Suppliers

Target Outputs: DimSupplier

Logic Flow:

- Step 1: Ejecuta SQL para obtener el máximo supplierid.
 - Step 2: Extrae nuevos registros de Suppliers.
 - Step 3: Inserta en DimSupplier.
-

Asset: FactSales.dtsx

Purpose: Carga de hechos de ventas, validando integridad referencial y usando staging.

Complexity: LOW | **Estimated Effort:** S (Small)

Downstream (Consumers): b0714cac-7ea2-477f-8e9f-a06f49f5b58a, DimProduct SSIS Package (SCD), DimCategory SSIS Package, DimSupplier SSIS Package, DimEmployee SSIS Package, DimCustomers SSIS Package, DimShipper SSIS Package

Source Inputs: Sales.Orders, Sales.OrderDetails, Production.Products, dw..V_DimProduct, tempStage

Target Outputs: FactSales, tempStage

Logic Flow:

- Step 1: Extrae datos de órdenes y detalles.
- Step 2: Cruza con productos y dimensiones.
- Step 3: Inserta en tabla staging.
- Step 4: Inserta en FactSales.
